

The suction units of the PD series with power from 1.1 to 15 kW are used in pneumatic conveying systems for throughputs of up to 3000 kg/h over distances of up to 150m.

#### TECHNICAL SPECIFICATIONS:

- 1- to 3-stage side-channel blowers.
- Self-cleaning filters with polyester cartridges and dust container.
- RS485 ModBus interface.

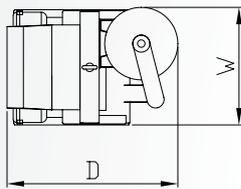

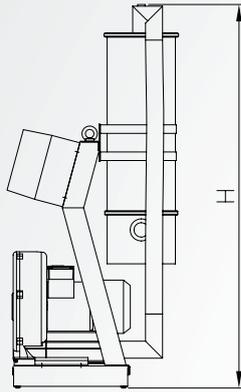

#### ACCESSORIES:

- Pressure gauge for clogged filter alarm.

#### ADDED VALUE:

- VERSATILE
- Suction units are available with two loading stations.

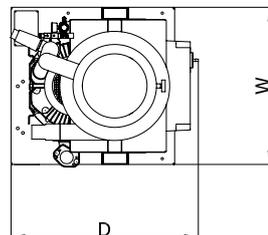

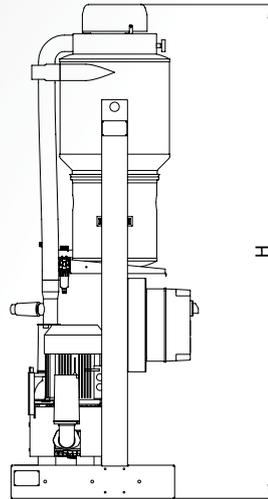

Suction units

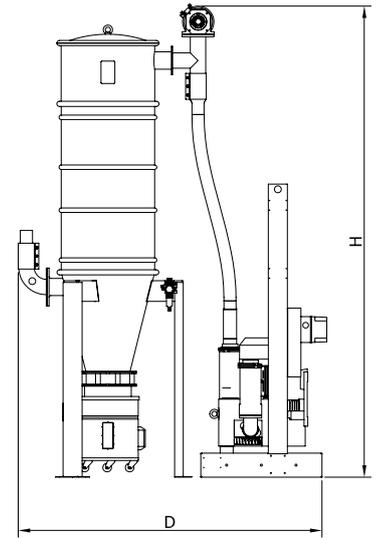

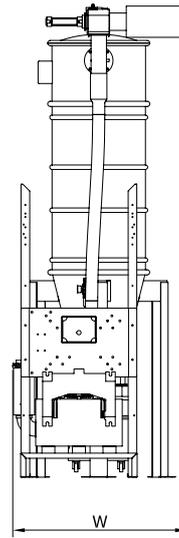

PD1-3 (FC1)

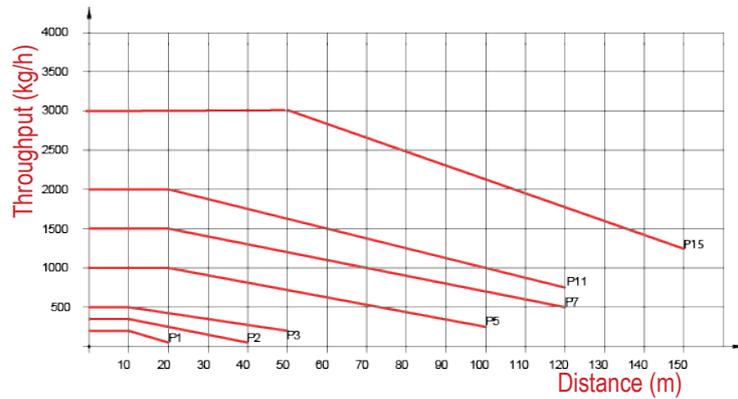

Duo-System valve

PD3-PD11 (FC3)

PD7-15 (FC8)

\* Nl/cycle = compressed-air consumption to clean the filter at the end of each suction.

The control software allows the operator to set the cleaning frequency of the filter, therefore the overall hourly compressed-air consumption must be calculated accordingly.
